PROFESSIONAL SUMMARY

Results-driven Module Lead with extensive expertise in full-stack development, microservices architecture, and cloud platforms. Proven track record of delivering scalable applications while guiding high-performing teams to exceed project goals. Proficient in leveraging AI-assisted development tools, including GitHub Copilot, and implementing AI workflows to boost productivity, automate tasks, and accelerate software delivery. Committed to fostering innovation and efficiency in software engineering through strategic leadership and the integration of cutting-edge technologies.

SKILLS

C#, .NET Core, RESTful APIs

HTML5, CSS3, JavaScript, ES6

GitHub Copilot, OpenAI APIs, prompt engineering, agentic workflows

React JS, Redux, Next JS, Node JS

GA, GTM, Segment, Mixpanel, HubSpot

Python, NumPy, Pandas

WORK HISTORY

Module Lead | BOLD Technology Systems Pvt Ltd - Noida

04/2022 - Current

- Led the development of web applications using **ReactJS** and **.NET Core**, focusing on performance, scalability, and seamless integration of **RESTful APIs**. Collaborated with teams, mentored juniors, and ensured high code quality through testing and reviews.
- Developed user-friendly interfaces with ReactJS and ASP.NET, collaborating with cross-functional teams to ensure timely delivery, and optimize system performance. Utilized **Agile methodology** for task estimation, tracked progress, and coordinated with QA, **DevOps**, and Support for smooth software delivery.
- Transitioned the project to React JS, utilizing analytics tools (**Mixpanel, Segment, GA4**), and email platforms (**HubSpot, Pinpoint, and Iterable**).
- Developed reusable React components, created a multi-tenant .NET Core app, and enhanced the project scope by addressing issues, and adopting new technologies. Communicated updates to stakeholders.
- Maintained version control systems like **Git** for seamless collaboration among developers and engineers during project lifecycles.
- Improved code deployment efficiency by automating processes with **CI/CD pipelines**.
- Monitored the automated build and continuous software integration process to drive build/release failure resolution.
- Facilitated seamless cloud migration projects by providing expert guidance during the Azure Cloud implementation planning phases.

- Achieved 35–40% faster response times by optimizing application performance and scalability.
- Reduced recurring system defects by 30% through diagnosing over 50 system issues.
- Expanded application functionality by designing 40+ RESTful APIs for integration.
- Contributed to multiple projects by rapidly adapting to new technologies and frameworks.
- Increased test coverage by 70% using automated testing frameworks, reducing deployment issues.

EDUCATION

VIT University, Vellore - Vellore, India

06/2018

Bachelor of Technology: Information Technology

- Final Grade: 83.6%

RPM Public School - Hathras, India

05/2013

XII: PCM

- Final Grade: 89.4 %

RPM Public School - Hathras, India

05/2013

X: Science

- Final Grade: 89.3 %

ACCOMPLISHMENTS

- Siemens Star Award

CERTIFICATIONS

IIT Kanpur : Generative AI and Machine Learning

05/2026

PROJECTS

1.Resume Builder Products (2022 - Current)

- Engaged with a variety of products including **ResumeGenius**, **MyPerfectResume**, and **Zety**. These products aid job seekers in crafting professional resumes by utilizing diverse templates, high-quality data, and job listings to find the most suitable opportunities. Leveraging this software, we offer top-notch resume templates, cover letters, and optimal integration with web technologies such as **React JS**, **Redux**, **JavaScript**, **jQuery**, **C#.NET**, **ASP.NET MVC**, **SQL Server**, **Web APIs**, and Microservices Architecture. Proficiently utilized version control tools like **Git**, Mercurial, SVN, and TFS within Agile methodologies.
- Notably, received recognition for successfully matching jobs, maintaining Resume Quality Scores, and establishing Public Resume Sites for sharing resume links, integrated seamlessly with social platforms. Additionally, managed technologies like **Azure**, **Segment**, **GA**, **MixPanel**, and **SOLR** for enhanced functionality.
